To

The Assistant Secretary to the
Government of Mysore.
Revenue and General departments

Sir,

I beg to acknowledge the receipt yesterday of your letter no 22/D.C. of the 16th September 1896, calling on me to report what extra conservancy and Sanitary measures will be adopted in the part of the Mysore city called Hige-gud owing to the residence of His Highness the Maha Raja in the summer Palace which is in that part. I beg to submit as follows. —

2. The Vice-President informs me that when he and the Senior Surgeon and Sanitary Commissioner with the Government of Mysore, viz

by Dr. Benson, inspected the locality in question about the end of August 1896, the latter said that that part of the town was all right and suggested (1) the construction of 2 or 3 V shaped drains, (2) the removal of the Godagéri from its present site which is somewhat close to the summer Palace and (3) the acquisition of the vegetable gardens between the said palace and the Doddakere tank. These are being done and I hope to be able to report their completion ere long.

Further the Sanitary Commissioner has been addressed to favor us with any further suggestion which he may have to make in the matter. As soon as I hear from him the needful will be done and reports submitted to you.

3. The Sanitary Overseer of the

mohalla or division will closely ~
inspect- the locality in question daily
and report- in person to myself and
the Vice-President. The Sanitary ~
Inspector will inspect- it once in 3
days and report- the details in ~
writing through the Vice-President.
Collection of manure in and about-
the locality will be strictly forbidden
and the streets &c therein will be ~
swept- twice daily. The municipal
Commissioners of the Division ~
have been requested to inspect- it
much oftener than hitherto and
strive to keep it- perfectly clean.

4. I may perhaps add that-
I have seen Mr. Fraser, told
him the above details and ~
asked him, let-me know if at
any time he wishes anything ~
done

done in the matter of sanitation.

I have the honor to be

Sir,

your most obedient servant.

Revenue and General Departments

Sir,

With reference to Assistant Secretary's letter no 22/S.C. dated the 16th September 1896 and in continuation of this office no 139 dated the 19th September 1896, regarding the Sanitary improvements to be carried out in Allegaud as proposed by Mr. Fraser Valor and Governor to His Highness and the Sanitary Commissioner with the Government of Mysore, I have the honor to submit copies of the resolutions of the Board, one approving the Estimate for Rs 7000 and the other applying for a grant of 7000/- Rs required for the purpose as per Estimate herewith submitted for sanction. Works

Works to the extent of more than 4000 rupees have already been carried out and the others are in progress so that all the improvements may be completed before His Highness the Maha Raja returns to Mysore. The urgent improvements were undertaken by diverting funds provided for Sanitary works in other mohallas. Under these circumstances I beg you will kindly obtain sanction of Government for the grant of the sum now applied for to enable the municipality to attend to the urgent Sanitary wants of other mohallas.

I have the honor to be

Sir,

Your most obedient Servant

To.

The Secretary to the
Government of Mysore
Revenue and General departments

Sir,

In submitting herewith an extract from a D.O. letter received from the Senior Surgeon and Sanitary Commissioner with the Government of Mysore, and also copy of a letter received from Mr. S. M. Fraser the Dubash and Governor to His Highness the Maha Rajah, together with copy of reply thereto, I have the honor to request that you will be good enough to obtain permission of the Government for closing the wells and for building public latrines in Ellegagode. Estimates for the above works and for stand pipes, will be submitted for

for sanction soon.

2. As requested by the Senior Surgeon, the municipal Engineer will start by this night-train to inspect the new U drains constructed in the Civil and Military Station, Bangalore.

3. Lists showing the wells in use and those fallen into disuse are herewith submitted for reference.

I have the honor to be

Sir,

Your most obedient servant

S Marshall
President

Extract from a D O letter — received from the Senior Surgeon and Sanitary Commissioner with the Government of Guzerat.

Dear Sir,

I went round Ahmedabad this morning with Mr Fraser, and as I am leaving to night for Bombay, and it is just possible I may not see you, I write to say that I think that as there has been a case of Cholera in that block, that it is very essential that all the old wells both private and public should be closed, and I would suggest your having a list prepared of all the wells that are at present in use. All old wells not in use should at once be filled in or closed, and it would be better that whilst Cholera is round Guzerat that no one should

be allowed to use well water, and the
only way to prevent that is to close
them. If one of these wells got con-
taminated with Cholera poison
we should have a bad outbreak
I do not know the number of Stand
pipes that are there, but if you consider
that there are not enough, one or two
more might be added; not elaborate
ones, but the ordinary pipe with a
tap. The present drains should in
my opinion be flushed at least twice
a week and I would flush them
them direct from one of the Stand
pipes I would not put down any
more V shaped drains nor would
I spend any more in repairing the
old ones If you will send in
your Engineer to Bangalore for
a day I will shew him some V
shaped drains that are being —
introduced into the Civil and
Military Station, and which
I hope soon to have in the Petta
Ithagagode would be a Capital

place to try this System of drainage on and if it was found a success there, it may be applied to other parts of Ireland The cost would not be very great as the Slabs composing the Shaved drains can all be utilised and I think Lamas a cunning foot would do it. × × × ×

The question of the Sanitation of Islandmagee is of such vital importance that no expense should be spared — with reasonable limits to make the place above Suspicion Much has been done, but much more might be done. If you will let me know the date you are sending in your Engineer I shall arrange to shew him these drains, he can then have one report down for the Commissioners to see before the next Municipal meeting In the Civil and Militant States the people are so pleased with their Water supply for the town Connections themselves and I think

" It [illegible] would be so here.

× × × ×

[illegible] H Benson

Yours [illegible]"

for President

No 11.

6 2.97.

From.

C. M. Fraser Esq. I. C. S.
Tutor and Governor to H. H. the
Maha Raja of Mysore

To,

R. Ranjinda Raj Urs Esq.
Vice President
Mysore Municipality.

Sir,

I have the honor to make the following remarks about Illegegood and the possibilities of cholera cases.

(1) With regard to the case reported yesterday, on visiting the house this morning myself I found the man in good spirits and able to sit up, and with his pearls action

healthy, as found on examination by the Assistant Surgeon who accompanied me. On inquiry from the persons in the house and the municipal servants, it appeared that he had had no motions since 11. A.M. Yesterday, that he had had only 2 motions altogether and that when he vomited he brought up two long worms. This is vouched for by the municipal overseer who saw them, considering the present state of the man (who passed urine yesterday and also last night) and the history of the case, it appears to me very doubtful whether it was a true case of cholera at all. Now, while it is advisable to treat every suspicious case in the begining as if it were cholera, it is equally advisable that no case should be finally entered in the returns as such unless on review

of the whole circumstances, it is beyond doubt that the case was cholera and not something else. I beg therefore that the present case may be reconsidered by the medical authorities who treated it, in the light of these remarks.

(2) Further supposing that the case is one of cholera, and as said every precaution should be taken as if it were that disease as long as the man is ill.

I must point out that when I visited the house.

(a) There was no disinfectant at all in the house.

(b) The brother of the patient who does the nursing, had no instructions how to dispose of excreta and when I asked him to show where he had put what passed, he took me to a bush in open ground close to Mijagode

where the excreta had been simply flung down. Fortunately it appeared to be only urine. I need hardly point out that thus to throw down excreta tainted with cholera microbes, would be the best way to encourage the dissemination of the disease in the dust which the wind would scatter about. I would therefore strongly recommend that when cases of cholera occur in Illegagode, if the patient cannot be removed to the Cholera-shed, medical Assistant and municipal menial should be told off to nurse the patient; and not only dispose of the excreta most carefully, by mixing with disinfectant, burning and burying, but also show the people of the house how to do it.

3. Turning to the general state of Illegagode, I must congratulate

the municipality on the great improve
ment which has taken place in the
drainage and ventilation of that
quarter. Another very important
matter now demands attention and
that is the question of private wells
and latrines. It is easy to deal
with what is open, it is the concealed
nuisances that are most dangerous
and difficult. I know by experience
that it is often the custom in such
native houses to have a private well
and private latrine in the back-yard
quite close to one another, and it is
the water of such wells which are
most inevitably poisoned. Now that
there is a good supply of pure water
from the stand-pipes, such wells
are not wanted and should be
closed. Such latrines as described

are also most dangerous and should be cleaned and shut up. The question of providing public latrines for the inhabitants of Illiyzode is one well worthy of early attention, and meanwhile I would suggest that a house to house examination be made and the number of private wells and latrines be recorded and each dealt with according to its condition.

Begging that you will lay this letter before the municipality for early action.

I have the honor to be
Sir,
Your most obedient servant

(Signed) D. M. Fraser I.C.S.
Tutor and Governor to
H. H. the Maha Raja.

"Copy"

For President.

MFB

no 369.

Mysore City Municipal
Vice-President's office dated
8th February 1897.

To.

C. M. Fraser Esq. I.C.S.
Tutor and Governor to H.H.
the Maha Raja of Mysore.

Sir,

With reference to your letter no 4
dated 6th February 1897, I have
the honor to inform you that it
will be placed before the Board for
early attention.

2. Since the supply of the pipe
water no one uses well water for
drinking and cooking purposes, but
until the water project of the town
is completed it would be undesirable
to force the owners of wells to close them
but steps will be taken to induce them

to

to fill up such of those as fallen into disuse.

3. All over the town the middle and the working classes keep privy pits into which all the sweepings of their houses are thrown and have them removed periodically. But in the case of Allagaode every possible step has been taken to put a stop to this practice. With a little more persuation the system suggested by you will be followed. The introduction of a regular system of daily house to house conservancy will be necessary before the present pits are closed altogether. Much difficulty has been experienced to secure the services of the required number of scavengers to attend to the conservancy of the city but I can assure that every attempt-

will be made to overcome it.

(4). As for building public latrines sites will be selected and they will be constructed soon. I was only waiting the Government sanction for the estimate for improving Allegode, which I am glad to inform you has since been received.

(5) An extract from your letter under reference has been forwarded to the Civil Surgeon for the reconsideration of the cholera case in question: on the face of the distinct instructions to bury or burn the evacuation, I regret that the relatives of the patient should have exposed them as stated by you. This they must have evidently done during the absence of the municipal servants on duty at Nazarbad. I shall pay

particular attention to prevent a repetition of the same.

(6) From the 5th noon the medical assistant attended the patient and was present on the 6th morning when I visited the place. Probably he must have gone to the Hospital to attend to his work and return soon. In my own presence he gave instructions as regards diet but I do not know why the relatives failed to explain the matter to you.

I have the honor to be

Sir,

Your most obedient servant

No. 1225

To

The Secretary to the
Government of Mysore.
Revenue and General Departments

Sir,

I have the honor to submit herewith a declaration statement for acquiring lands required for constructing public latrines at Chaugula Nagar and Subhalla in the city of Mysore, and to request that you will be good enough to have the same published in the Mysore Gazette.

The necessity of the work is explained in the remarks column and the amount of compensation to be paid will be Rs 120 — which will
